

AT LAST. . . **Pharmaceutical News Index**

**THE MONTHLY COMPREHENSIVE CITATION AND INDEX
SERVICE WITH TOTAL ACCESS TO**

**FDC REPORTS (The Pink Sheet)
PMA NEWSLETTER
DRUG RESEARCH REPORTS (The Blue Sheet)
WASHINGTON DRUG & DEVICE LETTER**

PNI covers all items from the four principal newsletters of the pharmaceutical industry . . . about 8,000 total . . . cited and indexed annually. Monthly looseleaf issues contain complete citation and index sections, pre-punched for insertion in one of the two heavy-duty binders provided with each subscription.

PNI CITATIONS . . . carry the headline or title, all bibliographic data, plus all keywords and definitive descriptors assigned to each item.

PNI INDEX . . . is a rotating, permuted keyword index based on:

Personal names • Corporate names (agencies, panels, associations, firms, etc.) • Drug names • Subject areas

Any item can be accessed in the index by any of its 10-12 keywords. If users desire, the PNI Index will *stand alone*, since index entries include reference to the original newsletter source as well as the PNI citation. All FDA approvals and recalls are fully indexed by drug name, applicant, active ingredients, and principal indication.

SUBSCRIPTIONS: \$165 annually, plus \$15 if first-class mail is desired. New subscriptions include all issues in print during the current calendar year, plus all issues to come.

PNI . . . THE NEEDED SERVICE THAT IS NOW A REALITY.

IMPORTANT NEW TITLES

MOLECULAR ASPECTS OF MEDICINE

An Interdisciplinary Review Journal

Editors: H. BAUM, *Chelsea College, London* and
J. GERGELY, *Boston Biomedical Research
Institute*

Volume 1 Annual subscription (1976) \$40.00
Two-years (1976/77) \$76.00

The primary objective of this new publication is to encourage the bridging of the gap between the clinician and the biochemist by selecting a spectrum of topics in medicine to illustrate not only the molecular insights that derive from the application of biochemistry, but also the variety of challenging problems that medicine is able to offer to biochemists.

A selection of recent and forthcoming papers

W.P. COLLINS and J. HENNAM, Radioimmuno-
assay and Reproductive Endocrinology

Practice Makes Perfect

We know you count on your medical dictionary. That's why we made Stedman's 23 as perfect as we knew how.

Drawing upon the combined assets of man and computer, Stedman's captures the total spectrum of terminology relevant to the life sciences. Each definition has been reviewed by as many as five medical specialists to ensure proper coverage for subjects in overlapping fields.

Late developments in medical research have provided more than half of the 28,000 new or revised entries. Many of these terms are so current that they were still being entered as the main vocabulary was prepared for press.

Make it your practice to use Stedman's. We've made perfecting it part of ours.

April, 1976, 90,257 entries, 358 illustrations with 31 color plates, 1678 pages, \$21.95

.....bookbinders for over 200 years

..... presents an exciting concept
in binding for libraries

S U P E R - F L E X *

.....for library books

.....for periodicals

.....for paperbacks

SUPER-FLEX is a less expensive, sturdy way to bind periodicals, library books, and paperbacks. SUPER-FLEX is a unique binding concept using automation, quality materials, special polyvinyl adhesives—strong cover material over certified binder's boards—pages double fanned applying adhesive on spine and between spine-end of pages—double strengthened with strong stretch cloth covering spine.

SUPER-FLEX is not bound to L. B. I. standards—it is, however, *fully guaranteed*—not recommended for thick, brittle, or highly coated slick paper without examination.

SUPER-FLEX brochure fully describes this exciting binding concept. Write today for details.

Serials Updating Service

If you're lost in the confusion of the periodicals world—changes in titles and frequency, additional volumes, delays in publication, etc.—Faxon's *Serials Updating Service* can help you find your way.

The *Serials Updating Service*, containing current information on changes and bibliographic irregularities for all types of periodicals, is available in three ways:

Serials Updating Service—a monthly newsletter sent no charge to selected Faxon customers.

SUS Quarterly—a quarterly cumulation of the newsletters—\$7 one year, \$13.50 two years, \$20 three years.

SUS Annual—an annual cumulation of the newsletters—\$10.

The *Serials Updating Service* is an invaluable resource in the acquisition, serials records, reference and binding departments, wherever serials are processed.

New Volume I!

CURRENT CONCEPTS IN EMERGENCY MEDICINE: Management of the Unconscious Patient

The first in an annual series of promising publications, this new volume is the only book on this topic prepared by and for emergency personnel. It not only considers the special problems encountered in this field, but also offers emergency care specifics for all members of the team. Excellent chapters deal with on-the-scene-care, differential diagnosis of the comatose patient, diagnosis and management of drug induced comas, and initial management and differential diagnosis of comas of unknown origin. A complete overview of diagnostic emergency department procedures is provided, including discussions on lumbar punctures, arteriography, electro- and echoencephalography.

Consulting Editor for the Series: Ronald L. Krome, M.D.; Volume I by William R. Darmody, M.D.; with a contribution by Judith E. Tintinalli, M.D. May, 1976. Approx. 176 pages, 6½" × 9½", 27 illustrations. About \$12.00.

New 3rd Edition!

SYNOPSIS OF SURGERY

This new edition covers the etiology, pathophysiology, clinical manifestations, and diagnosis of a wide variety of surgical diseases. Principles and clinical correlation are stressed and treatment is discussed in general terms. Among the recent advances recorded in this volume you'll find: the newest protocol for radiographic and chemotherapeutic treatment of cancers; selective arterial perfusion for angiography and treatment of occult gastrointestinal bleeding; elaborate descriptions of management of thermal burns (in both acute and chronic phases); new concepts in the treatment of congenital cardiac defects in the very young; and much more. Especially interesting is a completely revised chapter on surgical infections, which provides valuable information on pathogenesis of infection.

By Richard D. Liechty, M.D. and Robert T. Soper, M.D.; foreword by Thomas E. Starzl, M.D.; with 31 contributors. April, 1976. 3rd edition, approx. 1,152 pages, 5" × 7½", 741 illustrations. About \$17.50.

New 9th Edition!

SYNOPSIS OF PATHOLOGY

Pathologists have relied on this practical volume for years as a useful survey of the full spectrum of pathology, both general and systemic. Section I offers a thoroughly revised examination of general pathology. It includes: expanded discussions of cell structure, genetics, and cell injury; a new chapter on immunologic disorders; new material on amyloid deposition; new information on mercury poisoning; and a completely revised chapter on growth disturbances. The section on systemic pathology also offers a number of new features. Highlights include: an expanded section on malignant lymphomas; a new discussion on infective endocarditis; and updated information dealing with the liver, gallbladder and pancreas, endocrine glands, female genitalia and breasts.

By W.A.D. Anderson, M.A., M.D., F.A.C.P., F.C.A.P., F.R.C.P.A.(Hon.) and Thomas M. Scotti, A.B., M.D. April, 1976. 9th edition, approx. 1,152 pages, 4 $\frac{1}{2}$ " \times 7 $\frac{1}{2}$ ", 496 illustrations and 3 color plates. About \$15.00.

A New Book!

PRACTICAL COMPETITIVE BINDING ASSAY METHODS

In spite of the wide use of CPB/RIA methods, a single reference source for comprehensive information has not been available. Dr. Ransom now offers — in one book — all the information necessary to perform Competitive Protein Binding/Radioimmunoassay procedures. After a complete examination of competitive binding principles, RIA methods are thoroughly explored to help readers make intelligent selection and execution of analyses possible with this methodology. Rather than catalog the rapidly expanding list of new radioactive materials, the author concentrates on general principles and illustrates them with representative samples. Making this text a practical "bench manual", it also includes laboratory protocol and incorporates requisite mathematics at appropriate points.

By John P. Ransom, Ph.D. February, 1976. 132 pages plus FM I-XII, 7" \times 10", 43 illustrations. Price, \$8.95.

New 2nd Edition!

INTRODUCTION TO HEALTH PROFESSIONS

Now students can be introduced to a wide variety of health careers with the educational and occupational information in this new edition. Each health profession is treated separately, giving a brief account of its development, a description of its unique contributions, educational requirements, professional procedures, and opportunities for employment. Licensure, financial aid, and the latest educational obligations are all covered. In addition, it provides a comprehensive view of how the newer, emerging professions fit into the total health picture.

Edited by Anne S. Allen, M.A., O.T.R. April, 1976. 2nd edition, approx. 240 pages, 5 $\frac{1}{2}$ " \times 8 $\frac{1}{2}$ ", 38 illustrations. About \$7.25.

New 4th Edition!

CHEMISTRY FOR THE CLINICAL LABORATORY

An excellent introduction to clinical chemistry for medical laboratory personnel, this new edition combines a good balance between fundamental chemical theory and the practical methods of laboratory tests. Unlike many "cookbooks" of chemistry, the quality of writing in this text makes clinical chemistry accessible to students using the current pathophysiological approach. Practitioners, from medical technologists to pathologists, who seek to review current theory will also be interested in the book. In revision, five new chapters have been added, including those on radioassay and toxicology; and five chapters have been fully revised, including blood collection and sample preparation, quality control, and cerebrospinal fluid.

By Wilma White; Marilyn M. Erickson; and Sue Stevens; with 6 contributors. April, 1976. 4th edition, approx. 832 pages, 7" \times 10", 205 illustrations. About \$17.95.

ST. LOUIS, MISSOURI 63141

A New Book!

CURRENT CONCEPTS OF THE VITREOUS INCLUDING VITRECTOMY

This new book combines the expertise of the most knowledgeable minds on the subject of the vitreous. The reports in this volume examine the results of a two-day seminar held to disseminate information and techniques in management of vitreous disorders. An especially interesting and well-illustrated discussion probes the use of vitrectomy in: proliferative diabetic retinopathy; non-resolving vitreous opacities; certain retinal detachments; trauma; hemolytic, phacolytic, and phacoanaphylactic glaucoma; etc. Another noteworthy discussion centers on the topic of ultrasonic evaluation of the vitreous. In addition, there is new information on pars plana vitrectomy indications, results, and complications. The material contained in this volume is the most up-to-date information available on the vitreous.

Edited by Kurt A. Gitter, M.D., F.A.C.S. May, 1976. Approx. 256 pages, 6¾" × 9¾", 271 illustrations. About \$29.50.

New 8th Edition!

MEDICAL PHARMACOLOGY: Principles and Concepts

The perfect alternative to an exhaustive reference work or the survey oriented review, the latest edition of this classic continues to cover medical pharmacology thoroughly — in direct, lucid language. Coverage is beautifully balanced between basic principles and current thought on therapeutic problems. To assure that information is kept constantly up-to-date, this book has been revised every two years since its first publication. Some of the outstanding highlights include: ample background material and references to meet the needs of students interested in greater depth and detail; an attractive two-color format that incorporates numerous summary tables and charts; expanded coverage on drug receptor interaction; and a brief bibliography which features the most recent reviews.

By Andres Goth, M.D. May, 1976. 8th edition, approx. 672 pages, 7" × 10", 83 illustrations. About \$17.50.

New 3rd Edition!

RESPIRATORY PHYSIOLOGY

Now in paperback, this clinically-oriented text continues to present basic physiology in a brief, clear manner. An excellent balance between pure physiology and clinical application, its non-quantitative approach and helpful glossary make the book extremely appropriate for respiratory therapists. Specialty areas, such as respiratory physiology in lung disease, respiration in the newborn, and respiration in altered environments are included. New material examines factors affecting oxygen transport by hemoglobin, tests used to detect small airway disease, and mechanically assisted and controlled ventilation. It also uses the International System of Units — torr instead of mm. Hg. and C° instead of F°. The appendix contains tables of symbols and abbreviations and a set of equations helpful in respiratory calculations.

By N. Balfour Slonim, M.D., Ph.D. and Lyle H. Hamilton, Ph.D. June, 1976. 3rd edition, approx. 256 pages, 7" × 10", 89 illustrations. About \$9.75.

Surgical Neurology

SURGICAL NEUROLOGY is devoted to neurological surgery. It publishes clinical and research papers dealing with this and allied fields. It also publishes historical and editorial material. It now has over 3,000 subscribers, approximately 2,000 in the United States and Canada, and 1,000 in other countries throughout the world.

No medical library is complete without SURGICAL NEUROLOGY. The current subscription rate is \$45.00 per year. Subscriptions are on an annual basis only (January–December). Back issues (Vol. I, 1973, and Vol. II, 1974, at \$45 each, and Vols. III and IV (1975) at \$30 each) are still available. Each volume is composed of six issues.

Reidel Books in the Bio-Medical Sciences

Evaluation and Explanation in the Biomedical Sciences

Proceedings of the First Trans-Disciplinary Symposium on Philosophy and Medicine, held at Galveston, May 9-11 1974

edited by H. Tristram Engelhardt, Jr. and Stuart F. Spicker
(Philosophy and Medicine 1)
1975, vi + 240 pp.
Cloth Dfl. 76,- / US \$28.00

This volume is addressed to models of explanation and to systems of value in the biomedical sciences. It includes essays which examine the interplay of facts and values in concepts such as health and disease, as well as the significance for medicine of notions such as self and body. Critical consideration is given to the legitimacy and role of such disciplines as philosophical medical ethics and a philosophy of medicine.

Philosophical Dimensions of the Neuro-Medical Sciences

Proceedings of the Second Trans-Disciplinary Symposium on Philosophy and Medicine, held at Farmington, May 15-17 1975

edited by Stuart F. Spicker and H. Tristram Engelhardt, Jr.
(Philosophy and Medicine 2)
1976, 278 pp.
Cloth Dfl. 80,- / US \$29.00

The aim of the Second Symposium was to examine some of the central philosophical issues raised by the neuro-medical sciences, and to do so in a context wherein philosophers, physicians, neuro-scientists, neurologists, neurosurgeons, and others with interest in the conceptual foundations of the neuro-medical sciences could share their vantage points with one another.

Selected Papers on Language and the Brain

by Norman Geschwind
Boston Studies in the Philosophy of Science, volume XVI
(Synthese Library 68)
1974 xii + 549 pp.
Cloth Dfl. 125,- / US \$39.50
Paper Dfl. 75,- / US \$26.00

The scientific investigations of Dr. Norman Geschwind have been concerned with the

properties of the human brain. His investigations into language, behavior and the human nervous system are of extraordinary importance not only for neurologists but for linguists, psychologists, psychiatrists, social workers, physicians, historians of medicine and philosophers.

This volume brings together Geschwind's essential works of the past ten years.

The Understanding of Nature

Essays in the Philosophy of Biology

by Marjorie Grene
Boston Studies in the Philosophy of Science, volume XXIII
(Synthese Library 66)
1974, xii + 366 pp.
Cloth Dfl. 84,- / US \$32.50
Paper Dfl. 46,- / US \$17.50

The book represents the development of the author's views in this general area over more than twenty-five years. It is a collection of scattered material and also includes three previously unpublished essays. It treats historical topics - such as Aristotelian biology - as well as some neglected contemporary writers, such as Plessner, Portmann and Strauss.

Topics in the Philosophy of Biology

edited by Marjorie Grene and Everett Mendelsohn
Boston Studies in the Philosophy of Science, volume XXVII
(Synthese Library 84)
1976, xiii + 454 pp.
Cloth Dfl. 110,- / US \$39.50
Paper Dfl. 55,- / US \$19.50

An anthology of recent papers drawn from historical and methodological investigations into the biological sciences.

Health, Medicine, Society

Proceedings of the International Conference on the Sociology of Medicine, Warsaw (Jablonna, August 20-25 1973)

Edited by M. Sokolowska, J. Holowka and A. Ostrowska
1976, approx. 530 pp.
Cloth Dfl. 105,- / US \$39.50

This sourcebook in sociology and health reflects the tremendous burgeoning of this new field of sociological interest. Its growth is determined by the changing health needs and demands of the societies of Europe and USA.

Quarterly Journal of Medical & Psychiatric Social Work

Social Work in Health Care

EDITOR

SYLVIA S. CLARKE, MSW, ACSW
Director, Social Service Department
The Roosevelt Hospital

Social Work in Health Care is a new quarterly journal created specifically for medical and psychiatric social workers in a wide variety of health care settings.

Each issue of *Social Work in Health Care* brings you original articles on social work practice, administration, and theory in hospitals, nursing homes, medical and psychiatric clinics, and other health care settings.

Table of Contents--Volume I, No. 1

Community Fieldwork Collaboration Between
Medical & Social Work Students
The Interprofessional Team as a Small Group
A Club Approach to Social Work Treatment
within a Home Dialysis Program
Adaptation to Chronic Dialysis: A Two-Way
Street
A Systems Approach to the Provision of Social
Work Services in Health Settings: Part I
Sample Bias in Patient Evaluation of Hospital
Social Services
Children's Feelings About the Hospital
Adolescents with Sickle-Cell Anemia Deal With
Life and Death
Mobile Consultation: An Integrative Approach
to Mental Health Service to Children
Opportunities for Leadership for the Social
Worker in Hospitals: An Administrator's
Expectations
BOOK REVIEWS
CUMULATIVE ANNOTATED GUIDE

And in Every Issue--

the CUMULATIVE ANNOTATED GUIDE

- summaries of articles relating to health social work, drawn from almost 3,000 other journals
- helps you "keep up" with the literature
- short and easy-to-read digests
- includes an "Index to Authors" with mailing addresses to write away for reprints of articles you want!

The ANNOTATED GUIDE covers:

- alcoholism and substance abuse
- cancer & terminal illness services
- cardiac services
- chronic disease services
- emergency room services
- family planning/abortion services
- geriatric services & nursing homes
- health care planning & administration
- health maintenance organizations (HMO's)
- hemodialysis services/renal transplants
- obstetrics/gynecology services
- orthopedic services
- patient roles & patient conduct
- pediatric & adolescent services
- psychiatric services
- quality assurance/medical audits/PSRO's
- rehabilitation services
- surgical services

Comprehensive Medical Coverage from the British Medical Journal

Achieved through the 13 world-famous
specialist journals published by the B.M.J.,
each focusing on a major field of medicine.

Presenting material of lasting value to specialists in fields ranging from cardiology to psychiatry, the B.M.J. publications include:

• **JOURNAL OF NEUROLOGY, NEUROSURGERY AND PSYCHIATRY** publishes original articles on all aspects of its subject matter by investigators and specialists throughout the world. The highest standards are maintained, both in the choice of material selected for publication and in the reproduction of illustrations. *Monthly. Annual Subscription \$65.50.*
• **ARCHIVES OF DISEASE IN CHILDHOOD** is devoted to all aspects of child health and disease, with emphasis on clinical paediatrics. Original articles by paediatricians and other specialists throughout the world. *Monthly. Annual Subscription \$65.50.*
• **ANNALS OF THE RHEUMATIC DISEASES** publishes original articles by authorities in the U.K., U.S.A. and elsewhere on every manifestation of the rheumatic diseases. *Annual Subscription (six issues a year), \$49.00.*
• **JOURNAL OF MEDICAL GENETICS.** A journal publishing articles on clinical, statistical, pathological, cytological and biochemical aspects of medical genetics. *Annual Subscription (six issues a year), \$49.00.*

The B.M.J. publishes also the following journals:

British Heart Journal • Gut • Thorax • British Journal of Venereal Diseases • Cardiovascular Research • British Journal of Ophthalmology • British Journal of Preventive & Social Medicine • Journal of Clinical Pathology • British Journal of Industrial Medicine

All subscriptions to the United States can be ordered from the **BRITISH MEDICAL JOURNAL**, 1172 Commonwealth Avenue, Boston, Mass. 02134. Subscriptions for all other countries should be ordered from the Subscription Manager, **BRITISH MEDICAL JOURNAL B.M.A. House, Tavistock Square, London, WC1H 9JR, England**, or through any leading subscription agent or bookseller.

FOREIGN & DOMESTIC SERIALS SUBSCRIPTION SERVICE TO ALL TYPES & SIZES OF LIBRARIES FROM 11 REGIONAL OFFICES IN THE U.S.A. AND CANADA

COMPREHENSIVENESS

EBSCO services periodicals, newspapers, annuals, yearbooks, irregular book/monographic series (numbered or unnumbered), and continuations. Our computerized price file lists over 100,000 titles. However, we gladly research any title ordered and do not expect the customer to provide publisher name and address. Our research cycle is thorough and provides a quick answer if we are unable to identify the publisher. We service titles from all nations of the world. The only titles we cannot (normally) service for you are order-direct by the publisher's requirement. (However, if you are a librarian who desires to place 100 per cent of all serials with a single agency, we can handle even the order-direct publishers for you.)

FLEXIBILITY

We believe what we do for you and how we do it should be determined by your needs. We have suggested procedures and formats. Our order processing and records are computerized, and we are able to employ our computer to service any special requests you may have. In the event you have a request which a computer, for some reason, cannot honor, we keep our typewriters handy and a perfect willingness to do whatever is necessary to suit your needs.

PERSONALIZED SERVICE

Our network of 11 regional offices headed by General Managers with experience and authority to act guarantees you responsiveness. Our 11 Managers have 151 years' experience among them in servicing libraries with serials subscriptions. Order control is located at our regional office. The Manager who commits is the Manager who controls. Each of our customers is assigned to one Customer Service representative, so there is consistency in communications.

Keppel Street, London WC1E 7HT, England

(Annual subscription \$32.00)

first published in 1912 as successor to *Sleeping Sickness Bulletin* (1908-1912)

(Annual subscription \$52.00)

published originally in 1926 as *Bulletin of Hygiene*—present title introduced in 1968

Environmental health—sanitation, water supplies, pollution, toxicology, food hygiene, occupational medicine

Community health—services, health education, maternity, childhood, family health, ageing, nutrition, housing, socio-economic factors, drug abuse

Epidemiology and control of diseases.

These abstract journals are complementary in subject coverage, with *Tropical Diseases Bulletin* concentrating on conditions in tropical and subtropical regions and *Abstracts on Hygiene* on those generally affecting communities outside these regions and on matters of universal importance. Notwithstanding the geographical division, *Abstracts on Hygiene* is the source of information on microbiological aspects of disease, wherever it occurs, while *Tropical Diseases Bulletin* covers medical parasitology and entomology.

ASSESSMENT OF SKELETAL MATURITY AND PREDICTION OF ADULT HEIGHT

(TW 2 METHOD)

by J. M. TANNER, R. H. WHITEHOUSE,
W. A. MARSHALL, M. J. R. HEALY, and
H. GOLDSTEIN

The determination of skeletal maturity or bone age has an important place in the practice of pediatrics, especially in relation to endocrinological problems and growth disorders. It is frequently useful in diagnosis and also in monitoring treatment with hormones and hormone-like drugs. This book presents a new and comprehensive system for assessing bone age in children which both in its detail and its flexibility has advantages over the systems now in use. It has been extensively tested in several countries and is presented here in its finalized form.

The development of each of twenty bones of the hand and wrist is illustrated by a series of diagrams and X-rays arranged as conveniently as possible for the pediatrician, radiographer or anthropologist who is assigning a bone age to a given child's X-ray. Prediction of adult height can be made with accuracy only when an assessment of bone age is added to knowledge of present height. The second part of the book gives regression equations which enable the reader to predict the most probable adult height and the limits between which it is almost certain to fall. Practical applications of this prediction are also given.

1976, 106 pp., \$22.25/£9.00

A GUIDE TO BRONCHIAL ASTHMA

by H. HERXHEIMER

Over the years many unlikely remedies ranging from scorpion venom to bilateral stellectomy have been suggested for the treatment of bronchial asthma. In this monograph, written for the general practitioner and the physician, Dr. Herxheimer reviews the limited progress which has been made in this fascinating field of research.

All aspects of the disease are described; its influence on respiratory function, its immunological background, the effect of mediator or modulator substances such as histamine and acetylcholine, slow-reacting substance SRS-A, prostaglandins, and the part which psychosomatic factors appear to play. There are chapters on laboratory investigations and the pharmacology of asthma, and more than half the text deals with methods of treatment, including a guide to prescribing.

1976, 148 pp., \$9.50/£3.80

ELECTRICAL SAFETY IN HEALTH CARE FACILITIES

by HERBERT H. ROTH, ERWIN S. TELTSCHER,
and IRWIN M. KANE

A Volume in the
CLINICAL ENGINEERING Series

This book provides both a basic and comprehensive account of clinically associated electrical hazards, with special attention to microshock, and practical, cost-effective steps to avoid them. It covers the causes of electrical hazards, gives alternative ways to solve safety problems, shows how to assure that safety will be maintained after installation, and discusses organizational problems. It contains sufficient detail to be immediately useful in practice.

After an introductory review of the basic principles of electricity, the book discusses the electrical environment faced by a patient in a modern hospital. A chapter on electrical installation emphasizes the detection and correction of faulty or hazardous wiring, and one on patient protection systems shows how to isolate the patient from external monitoring or therapeutic equipment malfunction. The book has extensive coverage of efficient and economical safety testing of equipment, and includes an outline for building a safety and maintenance organization from scratch.

1975, 234 pp., \$19.50/£9.35

The Distribution of the Human Blood Groups and Other Polymorphisms
Second Edition

A. E. MOURANT, ADA C. KOPEĆ, and KAZIMIERA DOMANIEWSKA-SOBCZAK, all of the Medical Research Council Serological Population Genetics Laboratory. This work, originally published in 1954, marked the first attempt to bring together all that was then known about the varying incidences of genetically independent systems of human blood groups. Now completely rewritten and expanded to include new information gathered over the last twenty years, this second edition is a unique compendium of the basic quantitative data on human population genetics. Complementing the text are sixty-seven blood group distribution tables; an extensive bibliography; indexes to the text, tables, and authors; and an appendix of the ABO blood group distributions. Society, Stress, and Disease
Volume 2: Childhood and Adolescence

Edited by LENNART LEVI, Karolinska Institute, Sweden. During this century new physical and psychosocial stresses have emerged, associated with the changing patterns of family and community life. Their effect on the formative years of childhood and adolescence are of particular importance. This volume deals with the stressors which influence development during childhood and adolescence, and considers practical ways of applying existing scientific knowledge in the prevention and alleviation of disorders.

Health Care
An International Study

Edited by ROBERT KOHN, University of London School of Hygiene and Tropical Medicine, KERR L. WHITE, Johns Hopkins University School of Hygiene and Public Health. This volume is the result of a unique international study, sponsored by the World Health Organization, of the utilization of medical care in twelve selected areas of the Americas and Europe. It compares morbidity, disability, use of health services, attitudes toward them, and reasons for seeking medical care, and also provides information on the prevailing health service systems and resources in each country.

Atlas of Clinical Neurology
Second Edition

JOHN D. SPILLANE, Welsh National School of Medicine. This new edition has been amplified with 225 new illustrations including photographs demonstrating the testing of limb movement, color photographs of the optic fundi, and diagrams illustrating the innervation of the upper and lower limbs. There is a new chapter on short and tall stature, and other chapters contain new sections on diseases not previously dealt with. From a review of the first edition: "This is truly a magnificent book." — Russell N. DeJong in *Neurology*.

... of special importance to anyone engaged in medicine or medical research—

FOUNDATIONS OF IMMUNOLOGY 1976

Edited by Abraham G. Osler
and Leon Weiss

... a series of monographs providing readers of diverse backgrounds with a clear statement concerning significant aspects of immunology. Each volume is an individual contribution by a distinguished scientist. As a series, the volumes present a comprehensive view of the field—

THE IMMUNOBIOLOGY OF MAMMALIAN REPRODUCTION

Alan Beer and Rupert Billingham, both of the University of Texas Southwestern Medical School at Dallas

NEW—a concise general synthesis of all immunobiological and immunogenetic aspects of reproduction in mammals. Readers should be familiar with basic principles of general immunology, reproductive biology, the anatomy of the male and female reproductive systems and mammalian embryology.

April 1976 approx. 272 pp. \$18.95

THE IMMUNE SYSTEM OF SECRETIONS

Thomas B. Tomasi, Jr., Department of Immunology, Mayo Clinic, Rochester, Minn.

NEW—a summary of current data concerning the concept of local mucosal immunity, indicating the chemical and biological basis for this concept.

February 1976 approx. 176 pp. \$18.95

RADIOIMMUNOASSAY OF BIOLOGICALLY ACTIVE COMPOUNDS

Charles W. Parker, Washington University of Medicine, St. Louis, Missouri

NEW—a detailed, comprehensive treatment of radioimmunoassay methods and their application to the measurement of biologically active compounds. This text is intended to provide the information needed for an investigator or analytic chemist to set up and properly use sensitive immunological methods.

June 1976 approx. 272 pp. \$18.95

COMPARITIVE IMMUNOLOGY

Edwin L. Cooper, University of California, Los Angeles

NEW—a book that introduces the comparative approach to immunology. It covers information derived from the simplest invertebrates through the complex placental mammals.

March 1976 approx. 480 pp. \$19.95

COMPLEMENT: MECHANISMS AND FUNCTIONS

Abraham G. Osler, New York University of Medicine

NEW—a comprehensive overview of the present status of the complement system. This text has been designed to familiarize the non-specialist in all fields of this important area of biomedical research.

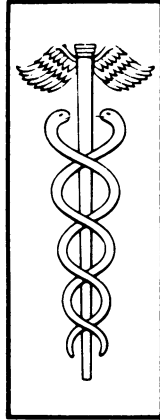

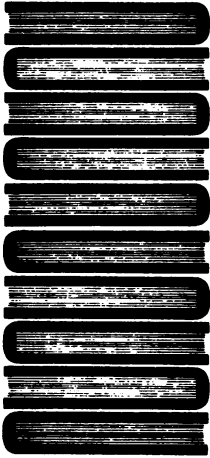

January 1976 193 pp. \$18.95

Prentice-Hall

For a free 15-day examination copy of any of the above books, please write to Robert Jordan, Prentice-Hall, Inc., Dept. J471, Englewood Cliffs, New Jersey 07632. If payment accompanies order, we will pay postage, handling, insurance, or we will bill you for the book(s), plus postage and other charge—FULL return privileges apply.

One Of The First Medical Centers In Nation To Have Automated Book Catalog For Library

The Science Press automated library catalog at Mount Sinai Medical Center of Miami Beach, Florida, is one of the first computerized medical book catalogs published in the United States. The catalog is the result of long-time planning by the Center's administrators and trustees.

The Science Press automated library catalog at Mount Sinai Medical Center of Miami Beach, Florida, is one of the first computerized medical book catalogs published in the United States. The catalog is the result of long-time planning by the Center's administrators and trustees.

In a single volume, it presents the library's entire resources to nearby doctors, hospital departments or to the affiliated Tel Hashomer Chaim Sheba Hospital in Israel. The user can quickly and conveniently locate a book by author, title or subject, or can ascertain the complete serial holdings of the

library as well as films, video cassettes, audio-tapes and slides. This Science Press book catalog also explains the Center's policies and services. It has proved to be an extremely important means of communication to this large educational facility with its multilingual staff and students.

Their automated library catalog does a big job for Mount Sinai... and can do the same for any medical institution, university or teaching hospital.

We'll be happy to furnish more information if you return this coupon.

Human Development and Behavior

B. Starr and H. Goldstein. Psychology in nursing, employing life cycle approach and all major theories—from Freud and Piaget to transactional analysis. "Excellent . . . interesting."—AJN. 448 p., 1975, \$10.50

ISBN 0-8261-1550-0

Laboratory Tests in Common Use, NEW 6th edition

Solomon Garb. Now with 30 additional tests, such as for ketones, rubella, osmolality, mono diff, and more—as well as test procedures, drugs and foods that interfere with tests, and range of normal results.

255 p., \$8.95, Just published.

ISBN 0-8261-0186-8

Standards of Nursing Care NEW 2nd Edition

Joan Carter, M. Hilliard, L. Stoll, M. Castles, and A. Cowan. Guide to evaluation of patient care, with step-by-step directions for establishing outcome or process audit system. Includes many sample forms. 304 p., \$11.00, Just published. ISBN 0-8261-1362-1

The Patient in the Coronary Care Unit

Hannelore Sweetwood. All the basics, from physiology and the electrocardiogram to prevention and management of coronary complications. 430 p., illus., \$13.95, NEW

ISBN 0-8261-1600-0

The Challenges of Community Medicine

Edited by Robert Kane. Comprehensive, introductory text, including evaluation of health care programs and course design for teaching epidemiology. "Well-conceived and well written."—JAMA. 384 p., 1975, \$15.00

ISBN 0-8261-1860-7

SCISEARCH[®] SOCIAL SCISEARCH[®]

When you want to do a literature search *fast*

SCISEARCH and SOCIAL SCISEARCH are two new on-line retrieval files that give you instantaneous access to the world's most important journal literature in the sciences and the social sciences.

Easy Access. SCISEARCH and SOCIAL SCISEARCH permit you to conduct extremely rapid searches through a computer terminal located in your own facilities. In a typical 10 to 15 minute search with the computer—you use simple English-language statements—you can easily formulate your questions, examine preliminary results, and refine your search to specify what you want from the file. And because the system is tied-in to a nationwide communications network, most subscribers in the U.S. are able to link their terminals to the computer in Palo Alto, California, through a local phone call. Most European subscribers can gain access to the computer through an inexpensive toll call.

Vast Coverage. SCISEARCH provides a file of all items published in more than 3,700 scientific journals. Presently it offers access to over 800,000 items published since January, 1974. SOCIAL SCISEARCH covers more than 300,000 items published in over 1,400 social sciences journals since January, 1972. Plus items, deemed relevant from more than 1,200

journals in the medical, physical, and natural sciences. Both files are steadily growing. Each month thousands of new items are added. So you can use SCISEARCH and SOCIAL SCISEARCH for back-year searches or to locate new information months before it appears in printed indexes.

Tough Searches Made Easy. With SCISEARCH and SOCIAL SCISEARCH you can search by title words, word stems, authors, and organizations or by any combination of these techniques. In addition, citation searching—an exclusive feature of ISI's data files—permits you to locate more recent items relevant to a subject if you know about an earlier publication on the same topic.

What You'll Get. For every item retrieved, you can receive a full bibliographic description on-line. And you also get an ISI order number which you may use to place orders (by mail, phone, or telex) for copies of items from ISI's *Original Article Tear Sheet (OATS[®])* service.

For More Information. To learn more about SCISEARCH and SOCIAL SCISEARCH, just fill in the coupon below and mail it today.

SCISEARCH and SOCIAL SCISEARCH are available in the U.S., Canada, and Europe, through Lockheed Information Systems' DIALOG information retrieval service. ©1976 ISI

BUTTERWORTHS
MEDICAL SCIENCE TECHNICAL BOOKS

Handbook of Medical Library Practice

THIRD EDITION, 1970

*Edited by Gertrude L. Annan, Librarian, New York Academy of
Medicine and Jacqueline W. Felter, Director,
Medical Library Center of New York*

Paper bound edition of the well known guide to medical library management. Seventeen chapters, each by a practicing librarian, present vital information on all aspects of service to personnel in health science facilities—medical and paramedical schools, hospitals, research institutions. Emphasis on modern business administration, grants management, audiovisuals, automation, preservation of library materials, and library planning and equipment.

Reprinted 1973

411 pages, \$5.95

Now Available!

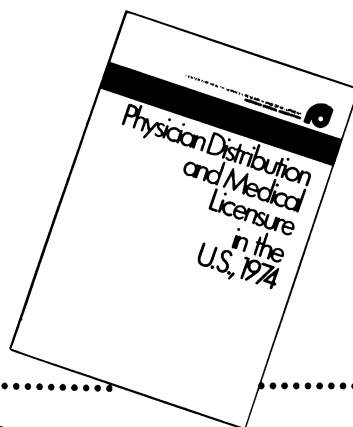

Physician Distribution and Medical Licensure in the U.S., 1974

**The one and only comprehensive statistical
report on physician population and licensure**

Compiled by the AMA Center for Health Services Research and Development, this report presents statistical data for comparing regions, divisions, states, and counties with respect to their total number of physicians by specialty and activity, number of hospitals and beds, physician-population ratios, and certain economic characteristics.

And, for the first time, it includes the annual compilation and statistics on medical licensure in the U.S.

Quantities are limited, so order now.

THE SERIALS LIBRARIAN is a new quarterly journal devoted to the practical aspects of serials librarianship. Articles deal with:

- serials management
- relationships with subscription agencies & publishers
- selection and acquisition
- binding, microfilm, and computer applications
- new issues and technology facing serial librarians today

Each issue of this quarterly journal also includes a comprehensive news section, and *Serials Digest*, a special feature summarizing important articles relating to serials work appearing in the major library journals.

Editor:
Peter Gellatly, Head
Serials Division
University of Washington
Libraries

Publication Date: Fall 1976
Frequency: Quarterly
Price: \$18 a year, including Index *

new

THE DE-ACQUISITIONS LIBRARIAN is devoted to research and practical methods of weeding books and periodicals in libraries of all kinds. Articles deal with:

- determining the least-used books & periodicals in your library
- selling or delegating weeded stock
- determining a library's core collection
- role of networking and cooperation in library weeding

Each issue of this newsletter also includes a *Current Guide to Literature Related to Weeding*, analyzing recent periodical literature useful for de-acquisitions planning and rational collection management.

Editor:
Stanley J. Slote, Ph.D.
Advisory Editor:
Lee Ash

Publication Date: January 1976
Frequency: Quarterly
Price: \$16 a year, including Index *

new

LIBRARY SECURITY NEWSLETTER is devoted to the protection, maintenance, and preservation of library assets. Articles deal with:

- book and periodical theft & theft prevention
- vandalism and willful mutilation
- fire security and fire prevention planning
- inventory methods, insurance, & risk management
- conservation, preservation & restoration of library materials

Each issue of this newsletter also includes a news section, new products, and *Abstracts on Library Security*, summarizing important articles relating to library security from the major journals in librarianship, security management, fire prevention technology, conservation, and institutional administration.

New Titles/New Editions

New (2nd) Edition PATHOPHYSIOLOGY

Edited by Edward D. Frohlich, M.D.; with 59 contributors

The mechanisms of bodily function in health and disease, updated with 10 new authors, 10 new chapters.

about 850 pages / about 195 illustrations /
2nd edition, 1976 / about \$30.00

New CLINICAL PEDIATRIC NEPHROLOGY

Edited by Ellin Lieberman, M.D.; with 20 contributors

Practical advice for physicians in management of children with renal disorders.

568 pages / 252 illustrations / 1976 /
about \$36.00

New (4th) Edition Kremers & Urdang's HISTORY OF PHARMACY

Revised by Glenn Sonnedecker, B.S., Ph.D.

A classic work, beautifully updated... the most ambitious book of its kind in English.

about 560 pages / about 120 illustrations /
4th edition, 1976 / about \$26.00

New ILLUSTRATED MANUAL OF FLUID AND ELECTROLYTE DISORDERS

By R. Douglas Collins, M.D.

A practical guide to diagnosis and treatment in the same graphic style as Dr. Collins' earlier manuals.

about 192 pages / about 60 full-color
illustrations / 1976 / about \$23.00

New ON THE SHOULDERS OF GIANTS Notable Names in Hand Surgery

By Joseph H. Boyes, M.D.

The fascinating story of the men whose names are sources of eponyms used in hand surgery.

about 256 pages / about 180 illustrations /
1976 / about \$15.00

New... APPLIED SURGICAL PATHOLOGY

Edited by A. E. Stuart, M.B., Ch.B., Ph.D., F.R.C.P.E., M.R.C. Path.; A. N. Smith, M.D., F.R.C.S.E.; and E. Samuel, B.Sc., M.D., F.R.C.S., F.R.C.S.E., F.R.C.P.E., F.R.C.R.

A new approach to surgical pathology for the surgeon in training.

1,112 pages / 820 illustrations / 1975 / \$120.00

New MEDICOLEGAL INVESTIGATION OF GUNSHOT WOUNDS

By Abdullah Fatteh, M.B., Ph.D., L.L.B., D.M.J., (Clin.), D.M.J. (Path.), M.R.C. Path, F.C.L.M.

A comprehensive, practical guide for investigators of firearm injuries and deaths.

about 285 pages / 118 illustrations /
1976 / about \$19.00

New... THE IMMUNE SYSTEM

A course on the Molecular and Cellular Basis of Immunity

Edited by M.J. Hobart, M.A., Ph.D., Vet. M.B.; and Ian McConnell, M.A., Ph.D., B.V.M.S.

A lecture course at the Royal Postgraduate Medical School, edited as a stimulating account of current immunology.

357 pages / 116 illustrations / 1975 /
Soft cover, \$16.50

FUNDAMENTALS OF ACID-BASE REGULATION... New 5th Edition

By James R. Robinson, M.D., Ph.D., Sc.D., F.R.S.N.Z., F.R.A.C.P.

"... essential... for those who wish to understand the complexities of acid-base regulation..." — *Hospital Medicine* (on a previous edition).

120 pages / illustrated / 5th edition,
1975 / soft cover, \$6.25

New... CLINICAL NEUROPHYSIOLOGY

By J.A.R. Lenman, M.B., Ch.B., F.R.C.P.

Aspects of the nervous system with particular bearing on clinical neurology and related specialties.

302 pages / 85 illustrations / 1975 /
\$27.00

New (3rd) Edition ELECTROCARDIOGRAPHY FOR THE ANAESTHETIST

By W. N. Rollason, M.B., M.R.C.S., D.A., F.F.A.R.C.S.

Thoroughly revised and enhanced with a new design.

182 pages / 98 illustrations / 3rd edition,
1975 / \$10.25
